## MEDICAL WRITER

A detail-oriented Pharm.D graduate with a strong foundation in clinical research, pharmacology, and medical communication. Completed a one-year internship at ESI Hospital, gaining hands-on experience in patient care and clinical documentation. Further enhanced expertise through a 6-month Advanced Diploma in Clinical Research, covering medical writing, pharmacovigilance, and clinical research methodologies. Began career as an Intern Medical Writer and progressed to a Full-Time Medical Writer, contributing to scientific articles, social media content, and marketing scripts. Passionate about transforming complex medical information into clear, accurate, and engaging content for diverse audiences.

## WORK EXPERIENCES

### Medical Writer

#### Internship + Full-Time Role

- ✓ Started as an intern and promoted to a full-time role based on writing performance.
- ✓ Prepared scientific manuscripts, articles, and digital content aligned with medical accuracy and brand tone.
- ✓ Created content for social media campaigns and marketing scripts targeting healthcare audiences.
- ✓ Collaborated with marketing and medical teams to ensure clarity, compliance, and engagement across all communication materials.

#### Internship -

- ✓ Completed a one-year internship as part of the Pharm.D program, gaining hands-on experience in clinical pharmacy and patient care.
- ✓ Participated in ward rounds and contributed to adverse drug reaction (ADR) monitoring and documentation.
- ✓ Developed strong knowledge of clinical pharmacology, pharmacovigilance, and hospital operations.

## PROJECTS

### Knowledge, Attitude, and Practice on Safety in Handling Cytotoxic Chemotherapeutic Agents

- Conducted a research project assessing the awareness and adherence to safety protocols among healthcare professionals handling cytotoxic drugs.
- Evaluated factors influencing safe handling practices and proposed recommendations to improve compliance and workplace safety in oncology settings.

### Comparative Study on Patient Outcomes with Urinary Tract Infections (UTIs)

- Performed a comparative clinical study on patients diagnosed with urinary tract infections, analyzing both clinical and microbiological profiles across tertiary care hospitals
- Assessed treatment efficacy, resistance patterns, and patient recovery outcomes to identify trends in antimicrobial response and therapeutic management.
